STD. WATER COOLED PACKAGED AIR CONDITIONERS (3.66 to 42.5 Tons)

WCP Models Series

Sabro water-cooled self-contained air conditioners are single packaged air conditioners. These units are factory charged, properly tested and internally wired for rapid installation. The only work required at installation site is to mount the unit at place, connect the Ducting, electric supply, drain connection & cooling tower piping system.

These units are designed for installation inside building either in a plant room or directly inside the building either in a plant room or directly in conditioned space. The unit consists of compressor, condenser shell, evaporator coil, evaporator fan & motor and all other necessary electrical as well refrigeration controls which are equipped with accessories.

These units are designed to provide maximum efficiency at tropical conditions. If required, the units can be provided with electric duct heater as an optional feature arrangements in supply ducting.

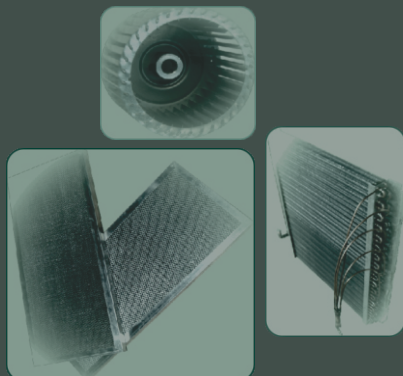

ON DEMAND, Larger Capacity Models are Available.

Available with Environment Friendly Refrigerants+DC INVERTER
