MINI WATER COOLED PACKAGED AIR CONDITIONERS

(0.75 to 3.00 Tons)

The **Mini Water Cooled Packaged Air Conditioners** are designed for installation within the conditioned room. The heat of conditioned room is removed through condenser water by means of a cooling tower. The use of cooling tower is essential with these units.

SABRO mini water cooled packaged air conditioners are available in 6 capacities i.e. 9000-36000. The major advantage of these units is to install in a multi story building with a number of offices. The individual unit is installed in each room as per requirement and connected to a central cooling tower by means of water piping.

This arrangement allows in individual to operate the unit/ maintain the temperature as per desired. This effective arrangement ensures controlled electricity arrangement. These units are ideal for use in Offices, Shopping Arcades, Departmental Stores, Restraints, Hospitals and other multi story buildings.

SABRO mini water cooled packaged air conditioners are equipped with internally spring mounted compressor's. Additionally, the casing of compressor is covered with insulating material to isolate the compressor's sound. The truly balanced centrifugal evaporator fans also results in lower sound level.

All of this is to reduce the operation noise of unit, to its minimum.

Also Available with Environment Friendly Refrigerant(R-407C/410A)
