# Component Details

## Casing Material

Units are made from Galvanized steel sheets, degreased, de-rusted, phosphate coated and finished electro statically with powder paint which is then baked. This results in excellent corrosion resistance ensuring longer life of the units.

## Compressor

Sabro has always placed sole reliance on copeland<sup>®/TM</sup> compressors, one of the most well reputed and reliable manufactures in the world. ALL AWC units consist of hermetic scrolls or semi hermetic reciprocating compressors, with completely independent refrigerant circuits.

## Refrigerant Control

Units are equipped with thermostatic expansion valve to control the flow of refrigerant through evaporator shells of chiller.

## Electronic Digital Thermostat

An intelligent programmable temperature control device. The thermostat is designed to perform function setting, time setting, security protection, failure error display and other various functions deeming essential for optimum performance.

## Condenser Fan and Motor

Propeller type (direct driven) fans constructed from heavy gauge aluminium are directly mounted on the shaft of condenser fan motors. The fan motor is enclosed with class F insulation and IP-55 protection.

## Chiller Shell

The evaporator is shell and tube direct expansion type (refrigerant in copper tubes and water in enclosed MS shell). The shell is made of MS seamless pipe & bundle of tubes is made of expanded "U" copper tubes. The refrigerant side is tested at 225 Psig pressure and water side is tested at 100 Psig pressure. The shell is insulated with closed cell high grade thermal break insulation.

## Condenser Coil

The condenser coil is made up of seamless copper tubes and aluminium foil fins. The tubes are mechanically expanded to ensure rigid contact with fins for greater heat transfer rate. These coils are tested under water with nitrogen gas at a gauge pressure of 450 Psig against leakage.

## Electric Control Panel

It consists of contactors, thermal overload relays, time delay relay and fuses etc. The control panel can be provided for remote installation in the field on request. Field wiring will be required to carry out with remote control installation.

# Safety Devices

## **Compressor Internal Protector**

Protects the compressor motor winding from overheating.

## **Power Monitor**

Monitors voltage fluctuations. It stops the unit from operating at high /low voltage or wrong phase sequence/phase reversal.

## **Compressor Over-Load Relay**

Protects the compressor fan motor by switching it OFF at higher than required current.

## **Condenser Fan Motor Over-Load Relay**

Protects the condenser fan motor by switching it OFF at higher than required current.

## **High & Low Pressure Cut-out Switches**

These switches are used to protect the compressor from any damage due to abnormal suction/discharge pressures.

## **Oil Protection Switch**

Protects the compressor from any damage due to lack of lubrication. (Only In Semi-hermetic Compressors)

## **Flow Switch**

It stops the unit, to protect it from any damage due to lack of water flow.

# Optional Accessories

## **Pressure Gauge**

Visual representation, depicting compressor's operating conditions, using high and low refrigerant pressure and oil pr. gauges (with semi-hermetic compressors).

## **Acrylic Protective coating**

On condenser coils, a protective coating of acrylic resin is used to prolong its life, specifically in sea line areas.

## **Low Ambient Control**

L.A.C is used to keep the compressor discharge pressure within operating limits.

## **Micro-Processor Control**

Computes logic to operate and monitor the unit, maintaining precise control of temperature and humidity.

## **Capacity Head Controller**

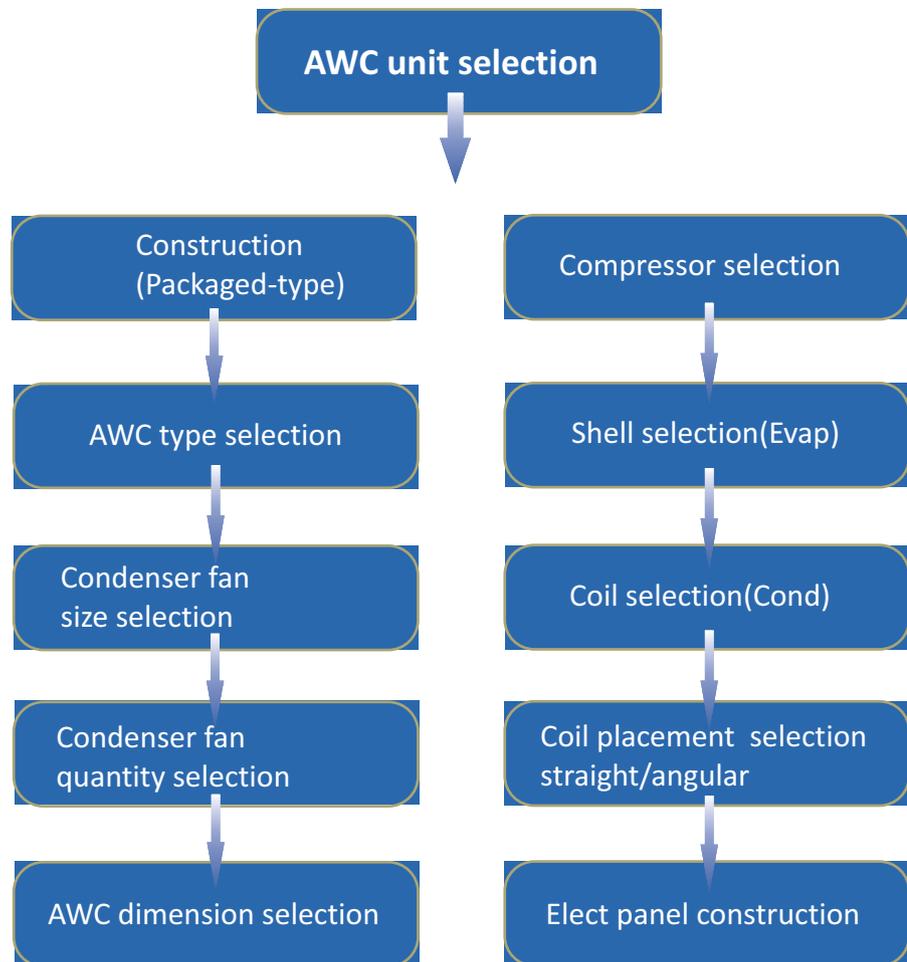

Controls system automatically by adjusting the compressor's pumping capacity (Only with semi-hermetic compressors) balancing the cooling load and permitting the compressor to start under partial load.

## **Hot Water Heating**

Reverse cycle arrangement is also available on requirement, for producing hot water for winter season.
